The history of CARL WALTHER began in 1886, when Carl Walther opened a gunsmith’s workshop. Already in 1908 he and his son created the Model 1, the first semi-automatic pistol. To this day the innovative spirit of the founders has guided and motivated this world-famous arms manufacturer.

At WALTHER innovation has been an enduring tradition – for 125 years. State-of-the-art research and production facilities in Ulm. Fritz Walther, who revived the company after World War II, shared this spirit.

In 1993 WALTHER joined the UMAREX Group, preserving the invaluable expertise of its employees and securing a foundation for future investments. WALTHER’s state-of-the-art research and production facilities, which extend over more than 12,000 square meters, are where visions become reality for the arms market of tomorrow.

Certified quality and environmental management.

WALTHER’s renowned models are manufactured according to the highest quality standards. Its quality and environmental management system is certified to DIN EN ISO 9001:2008 and DIN EN ISO 14001:2009. This means that WALTHER’s customers and business partners can be sure of getting excellent products and flexible, reliable service.

Top-quality weapons for sport, defense and police use.

Today WALTHER is one of the leading manufacturers of weapons for sporting and police use. Police units, armed forces and sport shooters have the highest regard for the performance of these sophisticated rifles and handguns. The name WALTHER has been inseparably linked with police pistols for 125 years. These weapons meet the highest possible standards of quality and reliability.

They are developed and perfected in cooperation with German police specialists and tested in accordance with strict German guidelines. WALTHER provides advanced equipment and services to police officers and special units for training, testing and analysis.

PPK, P99, PPS and PPQ.

The series of world-famous police pistols began with the now legendary WALTHER PPK and continued with the highly successful P99 and PPS. The latest innovation is the WALTHER PPQ, which came out in 2011. Police in the German states of North Rhine-Westphalia, Schleswig-Holstein, Hamburg, Bremen and Rhineland-Palatinate chose the WALTHER P99 as their service weapon. This reliable pistol is also used by the Royal Malaysia Police, the Polish National Police, the Dutch Police and numerous other police agencies around the world.

Precision craftsmanship doesn’t happen overnight. Since the beginning almost 130 years ago, WALTHER has been perfecting world-class firearms and is known throughout the world. Walther and his son Fritz created the first semi-automatic pistol in 1886. It was the first of many innovations. What was to become known as the Model 1 was the first practical self-loading pistol introduced in 1908. This revolutionary weapon served as a pocket pistol for the German World War I officers. This began the tradition of WALTHER’s history of supplying the military and law enforcement.

FEEL THE DIFFERENCE OF PRECISION ENGINEERING.

The new PPQ M2 has a traditional positioned magazine release button, reversible for right or left hand operation. A smooth quick-defense trigger delivers accuracy and fast follow-up shots. Interchangeable backstraps ensure that the sculpted grip meshes comfortably in your hand for greater control.
NEW 4" MODEL

PPQ® M2
Modest blacksmiths from the industrious German region around Suhl and Zella-Mehlis gave rise to special trades, such as rifle making in the mid-1800s. From this time and place came one of the most prestigious firearms manufacturing companies the world has ever known—WALTHER.

One of those famous blacksmiths was Carl Wilhelm Freund Walther. With only a modest amount of equipment and tooling, the young WALTHER began to manufacture hunting and target shooting rifles. WALTHER Arms was born.

AN EXTENDED BARREL FOR GREAT ACCURACY AND VELOCITY.

New for 2014, the smooth-shooting PPQ M2 is available with a 5-inch barrel. Extended barrel length offers a longer sight radius for greater accuracy and an increase in muzzle velocity. A smooth quick-defense trigger delivers accuracy and fast follow-up shots. Interchangeable backstraps ensure that the sculpted grip meshes comfortably in your hand for greater control. The PPQ M2 5" is everything you desire in a high-performance handgun.
NEW 5" MODEL

PPQ® M2
INTRODUCING THE FINEST RIMFIRE HANDGUN IN THE WORLD.

The PPQ M2 .22 is the best of both worlds. By combining smooth-shooting, ergonomically-advanced components of the PPQ with the fun and cost savings of .22 rimfire, you have the pleasure of shooting shot after shot both accurately and affordably.

And the tradition continued with Fritz and his four brothers. Fritz inherited his father’s passion for self-loading technology. He developed a number of new designs based on the Model 1. When automatic shotguns were gaining popularity, WALTHER began making double-barrel shotguns in 1932 as an extension to the small-caliber pistol business. WALTHER was becoming a world-renowned name in firearms.
NEW .22 L.R.

PPQ® M2.22
**3 Safeties**
Two drop safeties and a firing pin block for safe carry.

**Interchangeable backstrap**
Small/medium/large inserts change in seconds. Customize the grip to fit your hand for comfort, trigger finger reach, fast recoil recovery, and natural point of aim.

---

1. Low profile 3-dot steel sights with phosphorescent markings.
   Rapid aiming and target acquisition. Rear sight screw adjustable for windage. Low profile won’t snag clothing.

2. MIL-STD-1913 Picatinny rail.
   Mounts optional flashlight or laser.

3. Tenifer™ coated slide and barrel.
   Resists corrosion. Matte finish.

4. Serrated trigger guard.
   Perfect for tactical two-handed grip stance.

5. Quick defense trigger.
   Smooth, light 25N trigger pull for all shots. Short 10 mm trigger travel with safety and 2.5 mm trigger reset for fast, accurate second shots. Facilitates double-taps. Superb trigger feel aids accuracy.

6. Ambidextrous magazine release button.
   Conveniently positioned for thumb operation. Reversible for right or left hand operation.

7. Ergonomic WALTHER grip.
   Comfortable shape. Non-slip cross-directional grip surface for better control.

8. Ambidextrous slide stop.
   Slide locks back on empty. Slide stop is extended for easy gloved operation.

9. Front and rear slide serrations.
   Non-slip surface to operate the slide smoothly. Distinctive WALTHER styling.

---

**PPQ® M2**

**SMOOTH. VERY SMOOTH.**

The WALTHER PPQ is a smooth-shooting, precision-engineered masterpiece.
**PPQ M2 NAVY SD**

For operations in and near water. Developed in collaboration with special forces: The PPQ M2 NAVY is WALTHER’s pistol for tough police missions.

*SD = Threaded barrel, AFC= Anti-friction coating

**Power in spite of water resistance.**

The firing mechanism of the WALTHER PPQ NAVY has been optimized for operations in and near water. A hole in the striker channel ensures sufficient water displacement if the weapon becomes completely flooded with water. Hydraulic resistance is offset by means of a stronger striker spring. In addition, special guides reduce the water resistance when the striker moves forward.

**Barrel for silencer.**

The NAVY SD comes with 118 mm barrel with threaded muzzle (1/1”–28) for silencer

- Modified firing mechanism operations near and in water
- Tenifer®-coated steel parts
- Anti-friction coating for magazines
- MIL-STD-1913 Picatinny rail
- 118 mm barrel with threaded muzzle
- Magazines: 1 x 15- and 1 x 17-round
- Phosphorescent steel sights (optional with tritium night sights)

*SD = Threaded barrel, AFC= Anti-friction coating
THE CHOICE OF LAW ENFORCEMENT AND MILITARY PERSONNEL AROUND THE WORLD.

Tough, rugged and reliable, the P99 is a solid choice for law enforcement agencies or any shooter who wants a gun that delivers solid performance in the harshest conditions. Available in full and compact size, you can customize the ergonomic grip using interchangeable backstraps to fit your hand for greater control, comfort and natural point of aim.

Fritz Walther recognized the potential of double-action pistols. The PP, one of the first single/double-action pistols was born in 1929 and was an instant success. This introduction led the way to what is now the original pocket pistol, the iconic PPK.

In 1938, the German military wanted a more powerful sidearm. WALTHER made the P38 — which is still used today.
The WALTHER P99 is a solid choice for performance under the harshest conditions.

**Solid. Very Solid.**

- **3 Safeties.**
  - Two drop safeties and a firing pin block for safe carry. Plus a decocker.

- **Interchangeable backstrap.**
  - Small/medium/large inserts change in seconds. Customize the grip to fit your hand for comfort, trigger finger reach, fast recoil recovery, and natural point of aim.

- **Low profile three dot metal combat sights.**
  - Rapid aiming and target acquisition. Rear sight adjustable for windage. Low profile won’t snag clothing.

- **Weaver® accessory rail.**
  - Mounts optional flashlight or laser.

- **Tenifer™ coated slide and barrel.**
  - Resists corrosion. Matte finish.

- **Serrated trigger guard.**
  - Perfect for tactical two-handed grip stance.

- **Anti-stress trigger.**
  - Traditional double action. Initial shot 40 N trigger pull with 14 mm travel limits accidental discharge under stress. Subsequent shots 20 N pull with 8 mm travel.

- **Paddle-style ambidextrous magazine release lever.**
  - Conveniently positioned for thumb operation. Reversible for right or left hand operation.

- **Rear slide serrations.**
  - Comfortable shape. Non-slip cross-directional grip surface for better control.

- **Manual decocker.**
  - Flush with slide to prevent snags.

- **Rear slide serrations.**
  - Slide locks back on empty.

- **Ergonomic WALTHER grip.**
  - Comfortable shape. Non-slip cross-directional grip surface.

- **Several magazine options.**
  - Choose from standard capacity, high capacity or compact. Adapter available to fire full size magazines in compact frame.

Shown with 15 round magazine.

WALTHER's Tradition of Innovation Continues!

The innovative SoftCoil system allows easy racking of the slide so any shooter can have greater control, accuracy and comfort.

Thus the concept "user friendly" is redefined:
- Very low recoil for better control and accuracy
- Easy cocking of the slide provides all shooters with ease of use
- Low trigger pull weight for greater accuracy
- Easily accessible thumb safety for greater comfort and shooter safety

WALTHER sets the new standard for concealed carry pistols

The innovative SoftCoil gas-delayed blowback allows a significantly reduced recoil which also results in easy racking of the slide.

The CCP has an ideal combination of ergonomics, size, shape, accuracy, and ability to conceal comfortably.
NEW  9 mm x 19

CCP®
1 Low profile 3-dot polymer sights. Adjusted rear sight, 3 front sight heights for easy target acquisition.

2 MIL-STD-1913 Picatinny rail. For adding today’s accessories such as lasers and lights.

3 Easy cocking stainless steel slide. Available in black with Tenifer coating or silver stainless.

4 Light weight trigger for greater accuracy. Smooth, light 25 N (5.5 lbs) trigger pull for all shots, short 7 mm (0.27") trigger travel.

5 Reversible magazine button. Reversible for right or left hand operation.

7 Convenient manual thumb safety for easy use and accessibility. Additional internal firing pin safety for safe carrying.

8 Slide stop lever. Slide locks back on empty.

9 Front and rear slide serrations. For easy racking of the slide.

10 Magazine with comfortable finger rest. 8-round single stack.
When the trigger of the CCP is squeezed and the striker hits the cartridge, the bullet is set in motion. Once it passes the barrel’s gas port, some of the gas generated by the ignited propellant is directed through the port into a gas cylinder. The gas pressure in the cylinder acts against a piston that’s attached to the slide opposing its rearward motion, which effectively lowers felt recoil.

The benefits of SoftCoil Gas Technology extend beyond the softened recoil of the Concealed Carry Pistol. It allowed Walther engineers to specify a recoil spring with decreased tension, resulting in a slide that’s easy to manipulate and a shooter that remains focused and accurately on target.

**INNOVATIVE SOFTCOIL GAS TECHNOLOGY.**

The original WALTHER factory was destroyed during World War II. The only items Fritz managed to save after the conflict were a small number of the original drawings and the rights to approximately 80 patents.

The elder WALTHER continued the tradition by constructing a new modern factory in Ulm, a location where centerfire production is done today. WALTHER added multiple locations over the next few years and in 1949, the company celebrated its 1,000th machine, an incredible testament to an enduring legacy.

SOME SECRETS ARE HARD TO KEEP. THE PPS ISN’T ONE OF THEM.

The PPS is everything you look for in a concealed carry handgun. It’s lightweight, comfortable and very slim. At less than an inch wide, the PPS is so discreet you won’t even realize you’re wearing a gun – until you need it. It’s fast to bring into action and easy to shoot accurately.
The WALTHER PPS is a lightweight, comfortable and slim handgun.

With patented QuickSafe®.
With its patented QuickSafe® safety it’s as good as locked when the backstrap is removed. Among its special features are variable magazine capacities and backstrap sizes. In spite of its large 9x19 or .40 S&W caliber the PPS is a weapon with extremely slim dimensions. In design it’s a classic WALTHER pistol. It combines maximum safety with ease of use for concealed carry.

1 Low profile three dot steel combat sights.
Rapid aiming and target acquisition. Rear sight adjustable for windage. Low profile won’t snag clothing.

2 Tenifer™ coated slide and barrel.
Resists corrosion. Matte finish.

3 Weaver® accessory rail.
Mounts optional flashlight or laser.

4 Loaded chamber viewport.
Quick status inspection.

5 Smooth, light 27 N trigger pull.
Short trigger travel and reset for fast, accurate second shots. Superb trigger feel aids accuracy.

6 Paddle-style ambidextrous magazine release lever.
Fast, no-look magazine changes.

7 Smooth no-snag slide stop.
Slide locks back on empty.

8 Red cocking indicator.
Tactile and visible status for low light.

9 Rear slide serrations.
Non-slip surface to operate the slide. Distinctive WALTHER styling.

10 Ergonomic WALTHER grip.
Comfortable shape. Non-slip cross-directional grip surface.

11 Three magazine options.
Flat for concealment, mid for comfort, and large for extra capacity.

Shown with 7 round magazine.

01 – 03, WALther QuickSafe®
When the backstrap is removed, the weapon is decocked and can no longer fire. Safe stripping, safe storage – with WALther QuickSafe®.

04 – 06, Variable magazine capacities
The optional 8-round magazine has a magazine butt plate that extends the frame. With this and the interchangeable backstraps, the PPD can be adjusted to fit very big hands.

Optional accessories for the PPS
- 8-round magazine (9 mm x 19)
- 7-round magazine (.40 S&W)
- Tritium night sights
- LPA sights
- Lasers & lights
- Steel front sights in four heights
- Rear sight in two widths
ALL THE BENEFITS OF A PREMIUM HANDGUN AT A VALUE PRICE.

The PPX is a tough workhorse at a value price. Fully equipped with a smooth trigger for greater accuracy, three integral safeties for peace of mind and the famous WALTHER ergonomic grip for greater comfort, the new PPX delivers solid performance shot after shot.

WALTHER gained further momentum by launching new models of the PP, PPK and P38.

The product line and legend grew as the company introduced well-known reliable models such as the P1, TPH and PP-Super, P5. The company did not abandon the rifle business as it marketed two versions of a submachine gun and the WA2000 precision rifle.

PPX
With drop safety and a firing pin block for safe carry.

4. Loaded chamber viewport. Quick status inspection.
7. Ambidextrous push button thumb-operated magazine release. Conveniently located. Reversible for left- or right-hand use.
9. Front and rear slide serrations. Non-slip surface to operate the slide smoothly.
10. Slide stop. Slide stop locks back on empty.
11. Bobbed hammer. Won’t snag on clothing.

Shown with 16 round magazine.

The PPX is also available as a complete set with WALTHER paddle holster and double magazine pouch.
Fritz’s son Karl-Heinz continued the legacy and tradition, leading the business into the late 1960s. He had a passion for the sporting segment of the business and introduced several successful models. After celebrating its first successful century in business, the company took a step to the future when Wulf-Heinz Pflaumer and Franz Wonisch acquired the firearms business in 1993.

This new partnership resulted in significant advances and accomplishments. WALTHER’s innovative new competition rifles were used to win gold medals at the Atlanta Olympic games. The sporting and defense sectors continued its now legendary legacy as WALTHER continued to be the choice of military and law enforcement agencies around the world.

IT’S NOT EASY TO BECOME A WORLDWIDE ICON.

Few firearms can claim it. The WALTHER PPK is one of those few. The classic, sleek design of the PPK combined with its precision German engineering, makes this time-tested masterpiece a handgun every firearm enthusiast desires to own. The PPK truly sets the bar for handgun elegance.
The WALTHER PPK is an iconic handgun that has stood the test of time.

The ultimate compact handgun for concealed carry.

The PK380 is small, light and stylish, but packs a powerful punch. Its small stature makes the PK380 perfect for concealed carry. A smaller frame means it’s easy to conceal. The .380 caliber is powerful enough for any circumstance. The easy-to-operate slide, slight recoil and ergonomic grip make this handgun a great choice for any shooter.

The cornerstone of WALTHER is innovation, craftsmanship and German engineering. Today’s technology and enhanced manufacturing processes are enhanced by each craftsman’s attention to detail and heritage passed from generation to generation. Innovation is not always shown in just products. WALTHER embraces customer interaction and prides itself on setting the standard for customer service.
The WALTHER PK380 is a compact handgun perfect for concealed carry.

1. Low profile three dot polymer combat sights.
   - Rapid aiming and target acquisition.
   - Rear sight screw adjustable for windage.
   - Low profile won’t snag clothing.

2. Weaver® accessory rail.
   - Mounts optional flashlight or laser.

3. Tenifer™ coated slide and barrel.
   - Resists corrosion. Matte finish.

4. Take down lever.

5. Double/single action trigger.
   - 45 N trigger pull for double action.
   - 28 N trigger pull for single action.

   - Quick status inspection.

7. Paddle-style ambidextrous magazine release lever.
   - Fast, no-look magazine changes.

8. Rear slide serrations.
   - Non-slip surface to operate the slide.

   - Blocks firing pin for safe handling.

10. Ergonomic WALTHER grip.
    - Comfortable shape. Small size ideal for small hands.

11. 8-round magazine with finger rest.

Nickel or matte black slide.
Tactical styling.
Roughly 7/8 scale of the P99.

The latest in the storied legacy of WALTHER began in 2013 as Walther Arms, Inc. was formed in Fort Smith, Arkansas. This new American enterprise is solely responsible for servicing the North American market with specific emphasis on product development, customer service, sales and distribution. Being closer to customers and end users in the world’s largest firearms market will ensure WALTHER’s success well into the future. The blending of German engineering and innovation with American market and product knowledge put WALTHER in a class of its own.

The P22 L.R. is more than just fun. The contemporary, tactical styling of the P22 L.R. lends to the overall appeal of this accurate, easy-to-operate and fun to shoot .22 rimfire handgun. Make no mistake about it, whether you are shooting for fun or defense, the P22 L.R. is all business for shooters of all ages.
The WALTHER P22 is a fun handgun perfect for recreational shooting.

3 Safeties.
- Manual external safety
- Magazine disconnect safety

QUALIFIED TRAINING

Service for police units
WALTHER provides a special service to help train police officers and special units. Thus it is a preferred partner of the police.

WALTHER service:
- Interactive shooting range for police training, with state-of-the-art evaluation equipment
- Special shooting range for endurance tests
- Spacious training facilities for police seminars and workshop training
- Special premises for quality inspections by police officers
- Facilities for special tests, such as drop tests, sand, mud and temperature tests
- Super high-speed film camera for the analysis of motion sequences
WALTHER
A GERMAN SUCCESS STORY

This book, available in two volumes, was conceived to celebrate the 125-year anniversary of Carl Walther GmbH. This successful German company had its beginnings in the 19th century in the town of Zella St. Blasii (Thuringia), as a gunsmith workshop.

The first book begins with an overview of the events that occurred in the early 1990s, which brought the hand of fate in leading the WALTHER Company to merge with the Umarex Group. The historical portion addresses the origin of the WALTHER family business.

The second volume begins with the 1993 management change and is dedicated to the dynamic advances WALTHER made in the world market. By creating new models and developing innovative sports promotions, WALTHER has firmly positioned its company in the new century.

This is an amazing combination of history, innovation, and photography. If you are a firearms enthusiast or history buff, this book will be a valuable addition to your collection.
